

Drive2park

*"Find and Book parking in seconds"*

## **Introduction**

Drive2park is an Online Marketplace for booking parking space. Drive2park makes it easy to find and book parking space for any location.

## **Problems**

With the high percentage of vehicle ownership in the India, parking has become a conflicting and confusing situation for several people.

The following list identifies the kinds of problems that typically occur in a community.

- Motorists are likely to be frustrated if they expected abundant and free parking but find limited or expensive parking, or if they must spend excessive time searching for a parking space
- Businesses may experience difficulty in retaining customers if there is no parking space
- This problem can cause traffic congestion as motorists cruise for parking or stop in a traffic lane to wait for a space.
- Lack of sufficient parking at event site

## **Solution**

The Drive2park app would efficiently result in finding the parking space in particular location and Book it more efficiently.

Drive2park app development is highly suitable for the rescue in the urgent situation as it could be easily located nearby parking place or reserve the parking space.

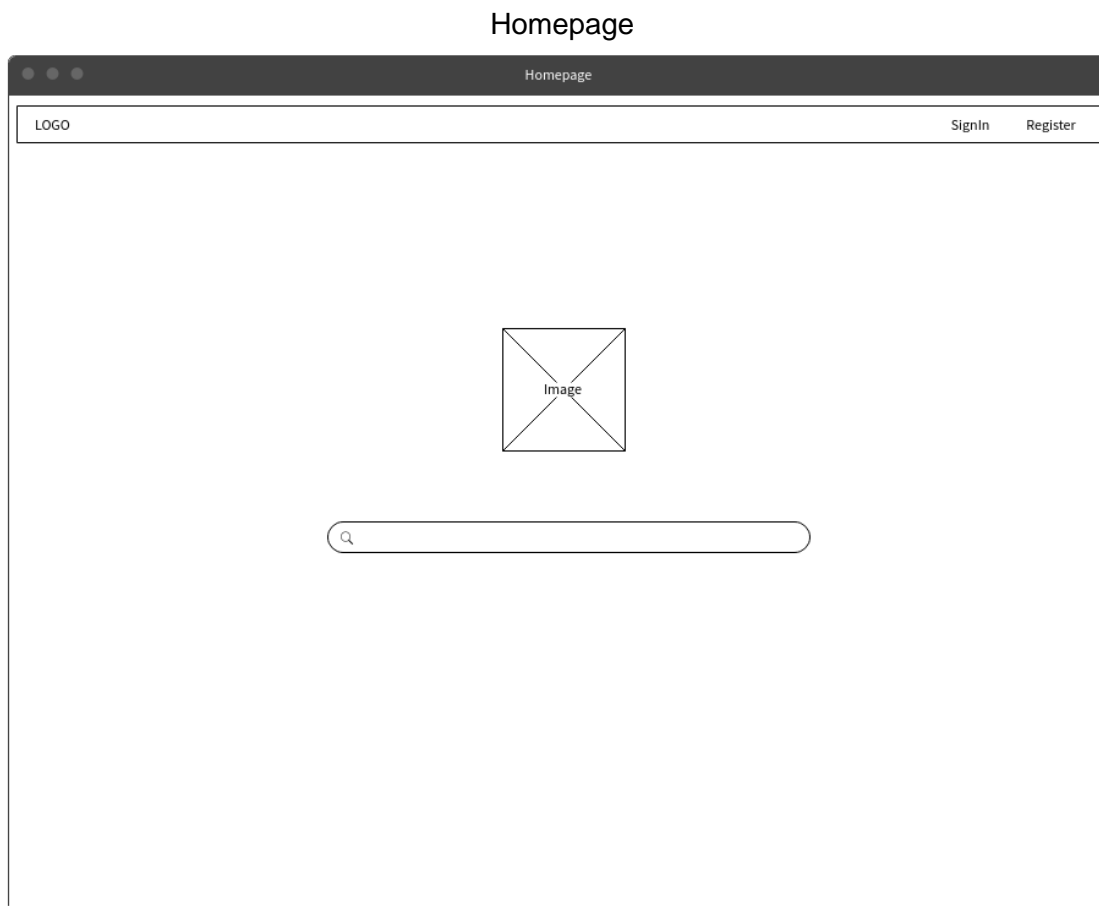

## Future Ideas

1. **Mobile App** - the site should be responsive and adapt to a mobile interface but there should be a convenient Mobile App
2. **Notification Feed** - Notifications of New Offers
3. **Browser** - Extension/Bookmarklet
4. **Google Maps** – Integration of Google Maps for real time locations.
5. **Payments**- More Other payment integrations.

## Competitors & Product Inspiration

1. [Justpark](#) – USA based Startup company
2. [yourparkingspace](#) - #1 UK Parking app
